Summary

I have worked with an IT company for almost 6 years. 9 years as a game developer and recently working as a Server Engineer. And more than 23 years of experience as a programmer. I have a lot of programming skills, including game development, mobile app development, web development, desktop apps, and IT skills such as server administration (Linux and Windows Server), MikroTik configuration, Cloud VPS configuration, computer networking, network security, and AI engineering. I'm a fast learner and unafraid to take on anything. I'm very passionate and willing to take on any programming job, including games, mobile, and web development, as well as roles in the IT department.

Career history

Server Engineer at Micronet Gigatech Indoglobal

Dec 2024 - Present (1 year 8 months)

Working as a server engineer responsible for configuring servers, firewall devices, router devices, managed switch devices, other network devices, and also as DevOps deploying software on server hardware, managing VPS for clients such as PLN, Pelindo, PTPN, etc. And recently helping develop AI features for company products.
